

Trauma-Informed Practice: Creating a Safe Haven Classroom

Provided at no cost by Star Net, Easterseals, SVCC, and Florissa

- After reviewing how complex trauma impacts the developing brain, practical application of this information will be emphasized. Join us as we learn how to design a safe haven classroom environment, make instructional accommodations to meet the needs of children who have experienced trauma, and recognize and respond to heightened emotions and challenging behaviors that are influenced by trauma.

- Webinar is structured for Administrators, ECSE and General Educators, Teacher Assistants, Family Members, Family Educators, Psychologists, Social Workers, SLP's, and OT/PT's.** 5 CE Hours will be given for participants who take the full webinar.

ELIZABETH FRISBIE | *webinar presenter*

Elizabeth Frisbie has worked with young children, their families and educators for over 25 years as a psychotherapist, behavior specialist, mental health consultant and parent educator.

She holds masters degrees in education and clinical child/family psychology and the Infant/Early Childhood Mental Health Credential and is a certified parent educator. Elizabeth has completed advanced training in early childhood special education, play therapy and reflective practice.

Come discover "what to do" with trauma-informed practice research information provided in this free webinar.

Participants who are on the entire time will receive 5 hours of credit.
